# BENEFITS OF REGULAR EXERCISE

Regular exercise is the investment your body pays you back for—every single day.

## 01. Improves Physical Health

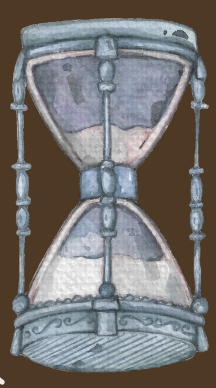
Strengthens your heart , muscles, and bones, and reduces risk of diseases like diabetes and high blood pressure.

## 02. Boosts Mental Health

Exercise releases endorphins (feel-good hormones), helping reduce stress, anxiety, and depression

## 03. Increases Energy Levels

Regular activity improves stamina, so you feel less tired and more productive throughout the day



## 04. Weight Management

Burns calories and boosts metabolism, helping you maintain or lose weight effectively

## 05. Improves Sleep Quality

Makes it easier to fall asleep and get deeper, more restful sleep
